I am currently a doctoral candidate in quantitative psychology (statistics applied to the analysis of psychological data) at the Ohio State University. My research is focused on the applications of latent variable modelling and machine learning to neuroimaging and bioinformatics data. I hold a master's degree in mathematical statistics and I have a strong foundation in multivariate statistics, scientific computing, and both the biological and cognitive sciences. I am dedicated to rigorous science in the public interest and I am passionate about the open access movement in science.
